Managed Services & Solutions

Take advantage of our team of full time **IBM Collaboration Services professionals** who are certified and experienced in both Systems Administration and Application Development from Notes 2 through to Notes/Domino 9.

Be confident that our consultants will use their knowledge and skills to successfully undertake your project on the day and afterwards.

We offer a range of flexible accredited managed services, from outsourcing a single element of your IT to a full ICT infrastructure outsource. We have a wealth of experience delivering managed services across a wide range of sectors.

As an independent provider we develop technology partnerships to ensure that we deliver the best possible service for our customers. Our managed services are flexible and scalable, designed to meet customer needs and keep pace with change.

Kelros can help you with all aspects of your environment, including:

- Deployment
- Consultancy
- Application Development
- Data integration
- Training
- Support
- Hosting

Our team will work with you to design your IBM Collaboration topology, deploy your IBM Collaboration software, audit your environment and upgrade your servers to ensure that they are configured to exploit the new facilities and functionality of the IBM Collaboration software.

For application development we follow a tried and tested protocycling methodology for undertaking all projects; either customising our shrink wrapped solutions or developing bespoke applications.

We also offer a full range of technical and end user training courses, for current and previous versions of IBM Collaboration software. Our public and private standard courses include detailed reference documentation to support a full skills transfer.

Contact us to find out more. Alternatively, please use the **Demo Request Form** to request a demo and to have a Kelros consultant contact you today.
